3 Arm Fieldking Sub-soiler Available with pipe-layer

FKSS-3

The sub soiler are deep tillage implements specially designed for breaking up hard pan layers and loosening the subsoil allowing better drainage, root growth and mineral osmosis.

- Optional wide range of roller/ crumbler available, which helps in breaking bigger lumps to smaller clods. Also it helps in depth control and steady run of the sub soiler.
- Adjustable depth & width of ploughing available for 2, 3 & 5 arm sub-soiler.
- Optional pipe layer attachment available for 1 arm sub soiler.
- Depth can be adjusted by top links.
- It can plough up to 550 mm deep
- The heavy duty pointed chisel
- Optional crumbler available in 3 & 5 arm sub soiler
- Shear bolt protection available in 5 arm sub soiler

Specs

General	
Length	830mm
Width	1520mm
Height	1060-1370mm
Tillage Width	1055-1284mm
Tyne to Tyne Distance	465-576mm
Tyne	150mm
No. of Tyne	3
3 Point Linkage	Cat - II
Working Depth	550mm
Crumbler	33.7mm x 25mm (T) Round Pipe
Crumbler Length	1530mm

Weight Without Crumbler	280kg
Weight With Crumbler	430kg
Tractor Power	80-95HP
